

# Why Urethane Finish?

When compared to a painted scoreboard, our urethane finish with UV inhibitors is top of the line. Well known for its durability and easy to clean surface, its used in the aerospace industry, commercial aircrafts and fire trucks. The unsurpassed performance of our urethane finish has proven to be capable of withstanding even the toughest environments such as: chemicals, detergents, graffiti, salt, stone chips, temperature extremes and other elements.

- ✓ **Cost-effective solution**
- ✓ **Unlimited colors**
- ✓ **Available from high gloss to matte finish**
- ✓ **Protected by up to three coats**
- ✓ **Endures the toughest environments**
- ✓ **Only Spectrum offers a urethane finish**

Spectrum uses up to three coats of urethane on heavy-duty .080 aluminum. This premium quality finish provides a cost-effective solution that transcends a basic paint finish that can fade prematurely or become costly to maintain. The rich gloss or matte finish is available in any color at no additional charge. Spectrum is dedicated to building scoreboards that are durable, functional and affordable.

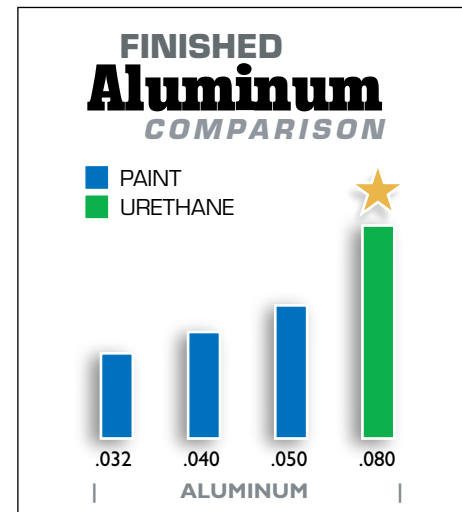

Why should you buy a urethane finish scoreboard? The answer is clear... when compared to paint..."No other finish compares!"

***We protect your investment with a urethane finish!***

## Urethane Finish -vs- Painted Finish

The urethane finish provides a cost-effective solution that transcends a basic paint finish that can fade prematurely or become costly to maintain. Spectrum uses up to three coats of urethane to create a high gloss finish. Available in any color at no additional charge.

This chart displays the durability of the finishes and the dent resistance of the aluminum. Spectrum scoreboards are built with the highest quality material available, providing a lasting experience.\*
